

Our **NEW** **FIVE** **STICK** **PACK**

The fast and effective knottec wood repair system now comes in a professionally packaged 5-stick pouch.

The convenient new pack size has been designed to offer an improved shelf life, while the clear window enables you to select the exact colour you need without opening the pack. Each pack now contains 5 sticks, meaning opened bags are consumed more quickly – leading to less waste.

The lower-cost 5 stick pack makes it more affordable to keep the entire range of shades on hand for perfect colour matching. Once opened, each pack is resealable.

Knottec® wood repair sticks have been especially formulated for the fast and effective repair of knot defects, deep scratches and other forms of deep wood damage. Suitable for use in most 12mm hot melt glue guns, knottec® is perfect for repairing wooden doors, window frames, furniture, floors, and much more.

Knottec® is available in sixteen different colours, ensuring the best possible match to the surrounding wood prior to varnishing and treatment. Knottec® is suitable for both general applications, where a fast setting, easy-to-trim and easy-to-sand product is required, and for applications that need a tougher, hardwearing product.
